Dear Hiring Manager,

I am writing to express my interest in the Cyber Security, Cloud Security, Multi-Cloud Engineer, SOC Analyst, or related graduate position within your organisation. I recently completed my MSc in Cyber Security from the University of Hertfordshire and have developed practical experience in cloud computing, cybersecurity operations, and automation through internships, academic projects, and hands-on technical labs.

During my Cyber Security Internship at N Wise, I gained practical experience in Linux administration, security monitoring, vulnerability assessment, digital forensics, and cloud security. I worked with industry-standard tools including Splunk SIEM, Wireshark, Nmap, Autopsy, FTK Imager, and VMware while deploying and securing AWS infrastructure using EC2, IAM, S3, and VPC services. This experience strengthened both my technical knowledge and my understanding of real-world security operations.

Previously, as a Python Developer Intern, I automated internal workflows, integrated APIs, debugged backend systems, and collaborated using Git within an agile development environment. This role enhanced my programming skills and demonstrated how automation can improve operational efficiency.

Alongside my professional experience, I have completed several practical projects involving AWS, Microsoft Azure, and Google Cloud Platform. These projects included designing secure multi-cloud environments, implementing Infrastructure as Code using Terraform, configuring cloud monitoring services, and evaluating Multi-Factor Authentication mechanisms within AWS IAM. Through these projects, I have built a solid understanding of cloud architecture, identity and access management, security monitoring, and infrastructure deployment.

I am particularly interested in opportunities that allow me to contribute to cloud security, SOC operations, DevSecOps, or multi-cloud engineering while continuing to develop my technical expertise. I am a proactive learner with strong analytical and problem-solving skills, and I enjoy working collaboratively to solve technical challenges and improve security outcomes.

I would welcome the opportunity to discuss how my technical background, practical experience, and enthusiasm for cloud security can contribute to your team. Thank you for considering my application. I look forward to the opportunity to speak with you.

Yours sincerely,

Smit Chahwala
