PROFESSIONAL SUMMARY

Entry-level Multi-Cloud and Cyber Security Professional with hands-on experience across AWS, Azure, and Google Cloud. Skilled in cloud infrastructure (EC2, S3, IAM, VPC, Azure VMs, GCS), security tooling (Wireshark, Nmap, Splunk SIEM), and automation with Python and Terraform. Strong foundation in networking, digital forensics, incident analysis, and identity and access management, with practical exposure to SOC workflows and containerization.

EDUCATION

University of Hertfordshire <i>MSc Cyber Security.</i>	UK 2026
LDRP Institute of Technology & Research <i>Bachelor of Information Technology.</i>	India 2025

EXPERIENCE

Cyber Security Intern <i>NWise</i>	June 2026 – Present Scotland, UK
- Administered Linux environments including user management, file permissions, shell scripting, and system hardening. - Conducted network traffic analysis and vulnerability assessments using Wireshark and Nmap to identify security weaknesses. - Configured and managed virtualised environments in VMware for secure testing and malware analysis. - Monitored and analysed security events using Splunk SIEM, building dashboards and alerts for real-time threat detection. - Led digital forensic investigations using Autopsy and FTK Imager, including disk imaging, file recovery, and evidence preservation. - Deployed and managed AWS cloud resources (EC2, S3, IAM, VPC) with a focus on security configurations and access controls.	
Python Developer Intern <i>Shree Drashti Infotech LLP</i>	May 2024 – Jul 2024 India
- Automated internal workflows using Python, reducing manual effort and improving operational efficiency. - Debugged and tested backend systems to improve application reliability and performance. - Integrated APIs and collaborated via Git, supporting agile development workflows. - Documented technical processes to support development lifecycles and knowledge transfer.	

PROJECTS

Multi-Cloud Security & Infrastructure Deployment

AWS, Azure, GCP

- Deployed secure VPCs on AWS with public/private subnets, route tables, NAT gateways, and IAM roles.
- Configured Azure Virtual Machines, VNets, and NSGs for secure cloud networking.
- Set up Google Cloud Storage buckets and Compute Engine instances with IAM policies.
- Implemented Terraform IaC to provision resources consistently across all three cloud platforms.
- Configured CloudWatch (AWS), Azure Monitor, and Cloud Monitoring (GCP) for unified observability.

Multi-Factor Authentication & Identity Security

AWS

- Implemented and compared TOTP, SMS, email MFA, IAM roles, and hardware tokens across AWS.
- Assessed resistance to phishing, credential theft, and session hijacking.
- Analysed CloudTrail logs and IAM configurations to evaluate authentication effectiveness.

Network Traffic Analysis & SOC Investigation

Wireshark, Nmap

- Investigated anomalies and suspicious traffic using packet-level analysis in Wireshark.
- Performed network reconnaissance and vulnerability scanning with Nmap.
- Documented findings and recommended mitigation steps aligned with SOC investigation workflows.

CERTIFICATIONS

- Deloitte Cyber Security Job Simulation (2025)
- Cisco Introduction to Cybersecurity (2026)
- Google Cloud Security Operations (2026)
- Python for Data Science, NPTEL (2023)

SKILLS

Cloud & DevOps: AWS: EC2, S3, IAM, VPC, CloudWatch, CloudTrail, Lambda, Azure: VMs, VNets, NSGs, Azure AD, Azure Monitor, Blob Storage, Google Cloud: Compute Engine, GCS, IAM, Cloud Monitoring, Terraform (beginner), AWS CLI, Azure CLI, gcloud CLI, Docker (beginner), container fundamentals, GitHub Actions (basic), Git/GitHub, CI/CD pipeline fundamentals

Security & Networking: Wireshark, Nmap, Autopsy, FTK Imager, TCP/IP, DNS, DHCP, routing, packet analysis, MFA, IAM policies, encryption, SOC workflows, Azure AD Conditional Access, IAM roles, Incident triage and security monitoring, Splunk SIEM

Programming & Systems: Python (automation, API integration, scripting), Bash scripting, Linux (Kali, Ubuntu), Windows Server, Virtualization: VMware, VirtualBox

ADDITIONAL

- Hackathon Participant: SSIP Hackathon, HackOut 2022
- Interests: Multi-Cloud Architecture, Cloud Security, SOC Operations
